

Anal Gland Success Stories

Jackson's Story

"I ordered Glandex after my 2 1/2 year old rescue dog Jackson, suffered infected anal glands. He needed his glands expressed by the Vet 3 times before the infection had even started. I didn't want him going through this anymore and in searching the web, I found Glandex and thought I'd give it a try. What a blessing it has been. I have had him on Glandex for about 5 months now and his anal glands have been great. No more visits to the vet and I couldn't be happier. Glandex is truly a wonderful product. I give it to him every morning in his food and he loves the taste. Thank you Glandex, your product is wonderful." Linda Duckworth & Jackson

Toby's Story

"My 6 year old dog was suffering with chronic inflammation of his anal glands despite being seen every few weeks to have them expressed by our vet. I specifically asked our vet if she had any recommendations about diet, supplements, etc and all she recommended was to mix Metamucil and green beans into his food. I had already tried the green beans on the advice of the vet that she actually replaced so I went home and looked on the internet for information thinking that there must be more that we could try and I luckily found the site for Glandex. I ordered it right away, it arrived within a few days, and I saw immediate results at home - dramatically less scooting and discomfort! When I returned to the vet for his scheduled gland expression in 4 weeks, the tech came out and told me that he looked amazingly better and that he did not need to return unless I noted a relapse. She wanted to know if I had given Toby the Metamucil and green beans as advised. I told her that I had found Glandex and that they should start recommending it to everyone! Thank you Glandex - you completely did "Boot the Scoot" and Toby feels so much better! I started giving it to my other 3 dogs as a preventative." Dr. Lynn Duboff & Toby
