

Cyclo Spray®

An innovative antibiotic spray for cattle, sheep and pigs.

Cyclo Spray® is an antibiotic spray containing **chlortetracycline** and indicated for prevention of infections of superficial wounds caused by surgery and trauma and as part of a treatment plan for claw/hoof infections including interdigital dermatitis and footrot.

Unique nozzle mechanism – can be sprayed upside down, no leaks or blockages and has a tight spray pattern.

Quality spray components – non-drip and fast drying, excellent adhesive properties, blue dye.

Practical – licensed for three species, zero days meat and milk withhold, available in a 211 ml spray can.

ACVM Registration No: A11391

Cyclo Spray® Features:

- ▲ Registered in three target species
- ▲ Zero days withdrawal for meat and milk
- ▲ Long lasting
- ▲ Can be sprayed upside down
- ▲ Delivers top spray quality
- ▲ Can does not clog up
- ▲ Is non-dripping and fast-drying

How to use?

- ▲ Shake can vigorously for optimal result
- ▲ Spraying twice for approx. 3 seconds with an interval is better than spraying once for a longer time when treating DD
- ▲ Spraying from a distance of 15-20 cm to the target surface gives very little dispersion
