Somulose®

Combining secobarbital and cinchocaine, Somulose® offers a humane, dignified euthanasia and its ease of administration aids user welfare.

-  Easy to dose – a single syringe contains the total volume of Somulose® required
-  Low dose (Equine) – 1 ml per 10 kg bodyweight
-  Rapid action and efficacy – administered over 10-15 seconds
-  Predictability
-  Compliance with high standards of animal welfare ethics
-  Solution for intravenous injection is presented in a 50 ml bottle. Kit contains 50 ml Somulose® vial and syringe, 14 gauge catheter and mini-spike dispensing pin
-  Specially designed euthanasia kit minimises risk of incomplete administration or self-injury.
-    Somulose® is also indicated for the euthanasia of cats, dogs and cattle.

ACVM Registration No: A11412
